for 960, 960A and 988A.

2. Break strength: The indicator will be improved from ≥ 0.40 N/ten to

≥ 0.50 N/ten for 917.

3. Color density: The indicator variation will be improved from $\pm 5\%$ to $\pm 3\%$ for the product specification of 917 and 917A.

Chopped Strand Product:

1. Carbon fiber content: The indicator variation will be improved from $\pm 0.1\%$ to $\pm 0.05\%$ for 911A, 911C, 911E, 91A, 911F and 911H.

Chopped Strand Mat Product:

1. Area weight: The indicator variation will be improved from $\pm 3\%$ to $\pm 2\%$ for the specification of 9170g.

2. Area weight tolerance: The indicator variation will be improved from $\pm 3\%$ to $\pm 0.5\%$ for the specification of 9170g.

3. Thickness tolerance: The indicator will be improved from $\pm 0.5\%$ to $\leq 0.15\%$.

4. Tensile strength: The indicator will be improved from 90% to 95% specifications.

Woven Ruggings

1. Area weight: The indicator variation will be improved from $\pm 3\%$ to $\pm 0\%$.

2. Weft count: The indicator will be improved from $\pm 0.5\%$ to $\leq 0.07\%$.
